

QuartzBio Delivers Quantifiable Business Value:

**\$150,000
Average
Savings
per Phase I
Trial**

The Challenge

Managing clinical trial samples is complex. Samples move globally across sites, labs and biorepositories, creating costly delays from site errors, vendor issues, or data entry mistakes. The average clinical trial experiences thousands of data issues, and 75% are missed by traditional reconciliation processes.

The Solution

Powered by our Precision Medicine AI Agent Platform, QuartzBio's Sample Intelligence™ solution provides a 360° view of every sample across their lifecycle, from collection to long-term storage. Receive timely insights and course correction, ensuring data quality, compliance, and cost savings without adding headcount.

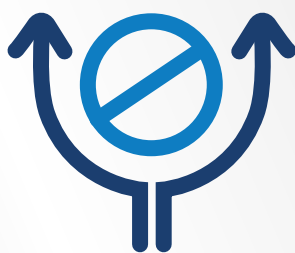

With QuartzBio, you can:

Save Time & Amplify Resources

- Increase productivity by 2x
- Focus teams on high-impact tasks
- 10x faster time to insights

Avoid Mismanagement of Samples

- Reduce out-of-protocol collections by up to 100%
- Eliminate duplicate sample testing / sample waste
- Improve collaboration

Avoid Protocol Deviations

- Drive ICH E6(R3) compliance and reduce overall compliance risk
- Accelerate access to high-quality data
- Reduce human error

Ready to save \$150,000+ per trial?

QuartzBio delivers 10x faster insights, enabling quicker study closures and better data quality -- with no added headcount required.

Transform your sample management.
